Facts // News // Information

## • EMM-Check - Customer Days

The registration numbers for the **EMM-Check 4** - customer days at

**16th of September 2015** in **Hannover**  
(Airport, Mövenpick Konferenz Center)

and at

**23rd of September 2015** in **Stuttgart**  
(Airport, Wöllhaf Konferenz- und Bankettcenter)

promise an active participation. Even if the registration period has now expired, there is still the opportunity to register on [www.reknow.de/kundentage](http://www.reknow.de/kundentage) or by calling

**+49 (0) 40/98 76 00 02!**

Participation is of course free of charge.

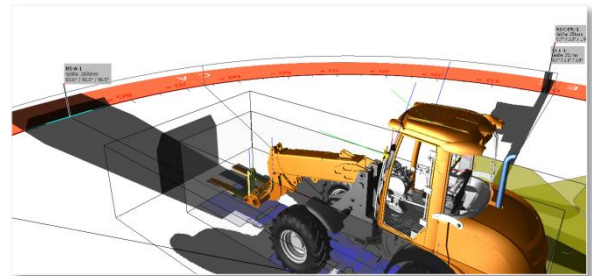

## • EMM-Check - Release 4.0.7.0 available

The release 4.0.7.0 will be released on 21st of August 2015. Significant performance improvements, first adjustments in relation to the current revision of the ISO 5006:2006 as well as the availability of a new standard - DIN EN 15830 - are the focus of version 4.0.7.0 (see also the next article of this **Panorama**).

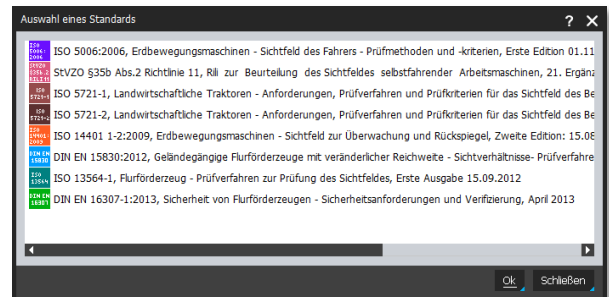

## • New standard available - DIN EN 15830

With the release 4.0.7.0 a new standard DIN EN 15830 "Rough-terrain variable reach trucks - Visibility - Test methods and verification" is available as a further standard in **EMM Check 4**.

**EMM-Check 4** is the leading software for visibility field analysis used by many manufacturers worldwide due to the currently 8 implemented national and international standards and regulations for

- Earth moving machinery
- Tractors
- Fork lifters and variable reach trucks

**Note:** Currently the ISO 14401:2004 is in implementation. This standard will be available with the release 4.0.8.0 (see "Release 4.0.8.0" on the next page).

## Performance improved

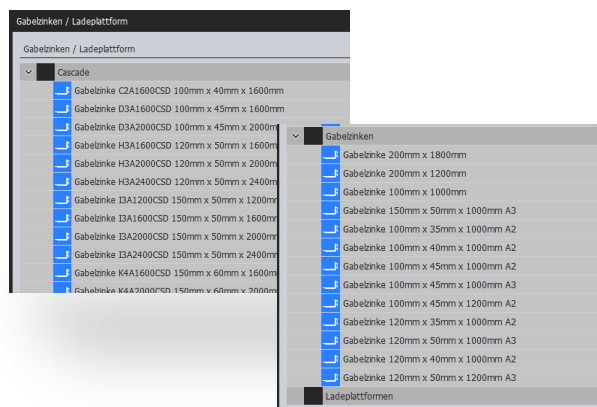

The permanent exchange of information and experiences between REKNOW and many **EMM Check 4** customers, REKNOW gains important insights for the further development of the software. In addition to the clarification of issues to practical interpretation of various definitions in the underlying test procedures, a new mathematical algorithm could be implemented in the release 4.0.7.0 which accelerates the calculation of mirror and camera visibility fields a lot.

- **Catalog for forks and test loads for DIN EN 15830 implemented**

All customers that use **EMM-Check 4** and one of the following standards

- ISO 13564,
- DIN EN 16307 *and*
- DIN EN 15830

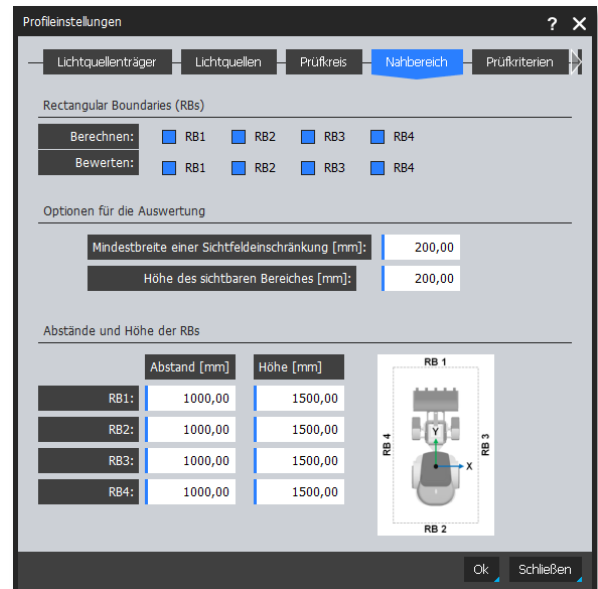

can use an extended catalog of forks and load platforms in release 4.0.7.0.

Furthermore standard compliant test loads according to DIN EN 15830 can be added from a catalog.

- **ISO 5006 - Height of test body can be adjusted separately**

In preparation of the upcoming changes in the ISO 5006 that are expected to be released by the end of this year or the beginning of next year, the first modifications have been implemented in release 4.0.7.0. The height of the test body can now be adjusted for each RB separately.

- **Release 4.0.8.0**

Release 4.0.8.0 is planned for the 9th of October 2015 and will contain the following new features:

- Working Lights (Hella)
- Configurable export of images for operating manuals
- New standard: ISO 14401:2004

- **Save the date**

Please note the following dates:

- Release of version 4.0.7.0 on 21st of August 2015
- EMM-Check Customer Days 2015
  - **16th of September 2015, Hannover**
  - **23rd of September 2015, Stuttgart**
- Release of version 4.0.8.0 on 9th of October 2015
- Agritechnica 2015
  - **8th till 14th of November 2015, Hannover**
  - **REKNOW on the booth of MEKRA Lang**
- Bauma 2016
  - **11th till 17th of April 2016, Munich**
  - **REKNOW on the booth of MEKRA Lang**
